

LTD Brauni - Confectionery Production

LTD Brauni was founded in April 2017 in Tbilisi, Georgia. The company produces high-quality confectionery products, using modern equipment and technologies. One of its main goals is to replace imported products with local production. Apart from being a leading supplier of locally made confectionery products, which compete effectively against foreign imports, the company also aims to expand its sales to neighboring countries.

To sustain these growth plans, the company invested in the construction of a new confectionery production facility and the purchase and installation of state-of-the-art production lines. Important considerations in the selection of equipment were the quality of the final product and meeting the highest hygiene levels in the production process.

Together with the EU4Business-EBRD Credit Line loan, which was used to finance the investment, the company received free-of-charge technical support from a team of international experts to optimize its investment plans.

Last but not the least, after the successful project verification, the company received 15% of the loan amount as a grant cashback, funded under the EU4Business initiative of the European Union

As a result of this investment, the company reaches high quality standards, whilst protecting the health and safety of its employees. In addition, the investment ensured that the company meets the wide range of EU standards from machine safety to waste management and environmental protection, including:

- Regulation (EC) No 853/2004 of the European Parliament and of the Council of 29 April 2004 on the hygiene of foodstuffs
- Directive 2012/27/EU on energy efficiency, amending Directives 2009/125/EC and 2010/30/EU and repealing Directives 2004/8/EC and 2006/32/EC Text with EEA relevance
- Regulation (EC) No 1005/2009 of the European Parliament and of the Council of 16 September 2009 on substances that deplete the ozone layer
- EN 1672-2 (2009) food processing machinery - Basic concepts - part 2: hygiene requirements

Loan Amount	€ 1,756,361
Grant amount	€ 263,454
Invested in	Construction of a production building and purchase and installation of new production lines
EU Directives met	Regulations related to occupational health and safety, product quality and safety, environmental protection
Primary Energy Savings:	180 MWh/y
GHG Savings:	6 tCO ₂ /y
